In [1]:
```python
# Month Names
```

In [3]:
```python
n = int(input("Enter the month (1 - 12): "))

if n ==1:
    month = "January"
elif n ==2:
    month = "February"
elif n ==3:
    month = "March"
elif n ==4:
    month = "Aprin"
elif n ==5:
    month = "May"
elif n ==6:
    month = "June"
elif n ==7:
    month = "July"
elif n ==8:
    month = "August"
elif n ==9:
    month = "September"
elif n ==10:
    month = "October"
elif n ==11:
    month = "November"
else:
    month = "December"

print(f"Month {n} is {month}.")
```

Month 10 is October.
